Abstract

the national program for the training and development of tourism in the article the main functions of the important tasks of covering mentioned. Moreover, the current application of the law on education of the republic of uzbekistan reflected in the article.

Keywords: Tourism, level of service, the national program for the training of trade.

INTRODUCTION

Today the high indicators of the tourism sector of uzbekistan are achieved: the number of foreign tourists increased from day to day, the sphere of the development of the tourism sector, the industry of infrastructure associated with the form, and unceasing the export of services to end users continues to grow. Obviously, the most promising and profitable tourism industry of the country's economy, science, education and business birlashtirmoqda. Development of tourism in the country today, the development of tourism industry of financial, economic and organizational basis accelerated in regard to the reform of conducts.

The development of the capacity of the tourism sector in the economy of our country is growing to understand the role of scientific processes occurred in the basis of preparation of the personnel to create a clear system, including the development of the modern model of professional tourism education requirements are taking. Because the world that meet the standards of highly qualified professionals, which hinder the development of tourism in the country is the most basic problem of scarcity. Modern tourism organizations and businesses today, new information systems, user equipment of computer technology equipped with high-tech production has to. In the current period, at the stage of modernization of the country's economic standing in the field of tourism and hospitality industry in a number of problems waiting for solutions, qualifying employees who work in the tourism industry, which can meet the requirements of the labor market preparation of specialists who put to the topical issue.

Currently, the state of the priority directions of social policy conducted in this business and private entrepreneurship, the development of tourism and the population at the expense of enhancing their level of income and living to achieve. Current practice in this regard to the increase of effective business and private entrepreneurship, many laws which make it demonstrates the effects of the execution. In this regard, the national education program of the day has important functions were implemented in the practice of today's weddings. The national training program "education" generated in accordance with the provisions of the law of the republic of uzbekistan, national and analysis of the experience in the education system, the world community agreed on the basis of the achievements of the young generation who came in the mature level of personnel to the task established. Especially today, many areas of the

services sector, including communication, transport, construction, tourism and services trade as an example we can come. Our society's well-being and conditions of their services in order to live a comfortable life in the field has many favorable conditions are being created. Living standards of the rural population of the country has been approached favorable conditions. The President Of The Republic Of Uzbekistan Sh.To assign oliy majlis of the republic of uzbekistan of 2018-28-year-in December, expressed in the reference implementation of the proposals made for the purpose of action on five priority areas for the development of the republic of uzbekistan in 2017-2021 strategasida according to the specified function. The following 2019, which refers to the year 2025 has developed from the concept of tourism development in the republic of uzbekistan. Thus, it is determined in accordance with the following:

-improvement of the normative legal base in the field of tourism activities, -create favorable conditions for tourism development,

-the development of the sector tourism services,

-specialists for the tourism sectors of preparation, retraining and training system, improving

-the development of transport logistics.

Mature in the way of personnel issues in social life, the importance of mature young people and educate them at a level of free thought and vision is one of the important stages of the development period. In this regard, the responsibility of teachers are highly responsible tasks. Generation of mature professionals prepared to go, to convey favorable conditions for obtaining their education, robert've one of the important stages. Mature we should be highlighting to the following stages in the process of cultivation of human resources. 1. Education-education is an integral affiliated

2. Get the support of modern information technologies in the educational process.

3. Efficient use of opportunities in the process of speech lesson.

4. Opportunities to use scientific creativity in bringing up talented young people go.

Above-mentioned from the stage of causing most importantly, this education is affiliated with education. Have an important role in the education system of education. Because it's not out of education with a one uzviylikda education students, science is not conducted at the firm level also without it. The teaching and practice of foreign languages to get it in the field of tourism continues to occupy an important feature. Also our young world standards for obtaining knowledge of foreign languages place is incomparable. In this respect, 2012, on December 10 in the "on measures for further improvement of the system of teaching foreign languages" on our young decision dated 1875, particularly the process of obtaining the latest knowledge and interest in foreign languages of governors of the school are also important. Thus, not only young people but also of the industry representatives also learn more on their own work and the teachers of the foreign language is one of the tasks maqdasli to be the same. In the field of personnel services in general plays an important role in not only all sectors of the economy. Optimize the working of the law of qualified personnel in the preparation of the labor market allows you to rise to a high level of power quality. The national economy and its built-in which is a piece of the world have their place in the service sector and the scale of development should be. Therefore, structural changes in the economy conditions suitable to qualified personnel is one of the most important problems of economic reforms. Almost of of the population living in our country accounted for 60% of youth make up. This mean the future is in the hands of youth of uzbekistan. Becoming qualified personnel to request them time to prepare. Every sector of our economy in the future plays an important role in the development of these young people. Tremendous progress in today's period, the demand for qualified personnel every day will rise. This training is the improvement in the new method makes the system also requires them to learn and to put into practice. In a word, we've descendants unless we are responsible for the contemporary youth, reading to our research personnel to keep up and mature looking

intensely at a level who stood before us is one of the tasks remains responsible.

Indeed, if there are some problems of our republic in the field of tourism, these problems are resolved through the preparation of qualified personnel in the field. Such a number of problems, primarily with the fully qualified personnel to handle the case of the tourism sector, as well as the development of professional skills in the field of tourism in foreign countries is based on the necessity of raising a human resources professional with not having full knowledge of is determined. These quotes you achieve to solve the problems, the sustainable development of the tourism industry is the increase in the level of provide qualified personnel to ensure cooperation with other countries and organizations in the area leads to concentration is achieved.
